

# Outreach Activities Organized by Wireless and Sensor Systems Laboratory (<http://wssl.org/>)

Our lab actively introduces our research ideas, progress, built prototypes, and accomplishments to next generation students at mid-school, high-school, and undergraduate levels.

---

**03/28/2022:** Charlene McKinzey Middle School (MISD) students visit WSSL and learn about our research projects

**02/2022:** UTA and Tarrant Community College students visit WSSL and learn how to build wearable systems for healthcare applications in a 3 days workshop (OurCS@UTA 2022)

**02/2021:** Dr. Nguyen leads an all female team at OurCS@DFW event (<https://uta.engineering/ourcs/>) to build a smart mask for breathing behavior monitoring. The event is organized online. Parts are shipped to students' homes for prototype fabrications.
